There are numerous sweepstakes games and platforms in the US these days, such as Riversweeps online casino, with players in all states able to access at least a few regardless of real money gambling laws. The social casino industry relies on sweepstakes software that allows you to play games like slot games for free, although it is still crucial that you stay safe even if there isn't as much money on the line.

Whilst there are numerous entirely legitimate platforms, like BetRivers Social Casino or Fortune Coins, sometimes we encounter sites that aren't quite right. Riversweeps, also known as RSweeps, is a name we have heard about recently, so we thought we would check it out to ensure it is legitimate before you start gambling there. Unfortunately, we're not sure Riversweeps online casino has services you can trust, and we certainly wouldn't spend any money there.

We have a lot of expertise in sweepstake casinos and undergo a rigorous set of protocols when deciding whether a platform is worth your time. Here are a few initial reasons we aren't so sure about the Rivers Sweeps site and software:

Riversweeps casino still isn't a 100% no-go yet despite all this. There are still reasons why customers might enjoy Riversweeps, especially seeing as businesses ranging from an internet café to a pub or bar can utilize its sweepstakes software to profit from the growing social casino market. Read on for a full lowdown on Riversweeps online casino and whether it is safe.

If you are looking for a better range of games and offers, we would recommend the 3 trusted casinos below instead of Riversweeps.

The River Sweeps system is slightly different from other social casino platforms, mainly because customers can use Riversweeps software to create their own gaming system. As a result, it allows a business to profit from people playing River sweepstakes games on their websites. On the one hand, this is a nice touch that allows for extra functionality, but on the other, it allows for unprecedented corruption. For example, it makes it straightforward for fraudulent websites to scam their customers.

Aside from this, you can use Riversweeps Casino services to play your favorite games like on other social casinos. However, right from the offset, we noticed a worrying amount of advertising, and it was difficult to find any information regarding potential prizes. Furthermore, in our experience playing Rsweeps software games, numerous strange game modes were automatically triggered and only seemed to make winning anything more challenging.

To make matters worse, on the Riversweeps Facebook page, average reviews sit at just 1.7 out of 5. Moreover, there are countless complaints from customers who have made a deposit and have not received any game credits. Needless to say, the Riversweeps Casino app doesn't appear to be a sweepstake casino you can trust.

You can read more about this sweepstake casino below, but we urge you to play on any of the following legitimate sweepstake casino sites

instead:

There was more strangeness when we delved into the games on offer at River Sweeps, separated into three unusual categories. At first, it seemed like a fun alternative to most other social casino websites. However, on closer inspection, a host of bizarre features heightened our belief that the Rsweeps software is a scam.

Regardless, here is a breakdown of the free game categories to play at Riversweeps and their features:

Rsweeps games almost exclusively consist of free-to-play slots. However, it is extremely difficult to find much information about specific titles or their RTP scores. The Riverslot software is designed so that anyone can use it to create their own catalog of RiverSweeps slots. Theoretically, this means River Sweep slot games can appear anywhere online without any certified regulation. To be perfectly honest, it all seems extremely fishy.

As a result, we cannot recommend playing any of the following Riversweeps slots, regardless of which server or website you find them on:

Social casinos need to offer bonuses to become genuinely popular nowadays, but it took us a while to find any mention of Riversweeps welcome promotions or other offers for current customers. In the end, we noticed an offer on the River Sweeps Facebook page. It is never a good sign to only find mention of sweepstake casino bonuses on social media, but here's what we found:

Another commonly referenced bonus is the free \$10 play credits for Riversweeps, but it doesn't seem to be valid today.

Due to the numerous problems we encountered with Riversweeps Casino up until now, we were surprised to learn that the phone Riversweeps online casino app was available for Android and iOS. It also seemed to work well on both. However, this was the end of anything positive regarding the Riversweeps online casino app. Keep reading to find out why for iOS and Android, respectively.

There was a red flag right from the beginning with the iOS Riversweeps app, as it doesn't appear in the Apple Store. Instead, to download the Riversweeps iOS app, you must search for "iConnect Game", which has all the RSweeps games loaded up. But it begs the question, why would you download anything that doesn't even have the River Sweeps name on it?

For online download casino tablet riversweeps

As a result, please stay well away from the Riversweeps iOS app. It may compromise your data, and you certainly shouldn't even consider spending any money on it.

To download the Riversweeps Android app you must go to the website and click the Android app option. Already, it is worrying that you cannot find the Riversweeps Android app on the Google Play Store. Once you have clicked on the Android app option, River Sweeps will supply an .apk file.

Usually, you would need to click "Allow From This Source" to allow your device to install the app, but in this case, we strongly advise you not to. For one, the app installs itself as Mobile Riverslot Casino, not River Sweeps. Furthermore, as an unregulated platform, there is no telling what this app could do, and it would likely end up compromising your data security.

As you can tell from the rest of this review, we don't think Riversweeps is legit at all. Aside from the various dodgy factors involved with this social casino platform, the fact no regulatory body licenses it is a huge reason in itself. Moreover, the game mechanics seem designed to scam users out of money, and it is impossible to find any mention of RTP on the available slot games.

One of the biggest reasons why we have decided that Riversweeps Casino is not legit comes from social media. For example, we were worried to find several different Riversweeps Online Casino Facebook profiles throughout our investigation. Each one of these had numerous bad reviews, with several users complaining they never received any credits after depositing money.

Moreover, these River Sweeps Facebook pages would regularly post status updates with new Cash App codes for players to make a deposit with. All in all, it completely and utterly reeks of a social casino scam.

Although River Sweeps casino is definitely a scam, don't let it put you off the wonderful world of social casino platforms. There are numerous certified options for players to enjoy these days, enabling you to play casino games for free and sometimes win real money in the process. Here are a few of our favorites:

Although LuckyLand slots doesn't have the largest selection of games, its catalog is exceptionally well-curated. Moreover, the sweepstakes casino uses two virtual currencies: Gold Coins and Sweeps Coins. The former is used primarily for free play, whilst the latter can unlock real cash prizes.

Another huge selling point regarding LuckyLand slots is the presence of progressive jackpot games. Here are a few of the best slots available at LuckyLand slots casino:

Powered by the popular online slot developer High 5 Games, High5Casino is a brilliant social casino option for those looking to test themselves out on a wide variety of games. All slots on the site have been tailor-made by High 5 Games, so there is a fantastic amount of quality available. Moreover, High 5 Casino rewards new players and current customers with a rich set of promotions, including slots tournaments and daily rewards just for logging in. The iOS and Android apps are also second to none. Look below for a few examples of what games are available:

To sum everything up, we can wholeheartedly say that Riversweeps online casino is a scam and should be 100% avoided. There are all sorts of reasons for this, but here are the main ones:
